

VirtuoCloud

**An advanced solution for securely
hosting your desktop-based accounting
and payroll software in the cloud.**

VirtuoCloud

Access your Sage Pastel Desktop software from any location, any time.

VirtuoCloud offers a robust cloud hosting solution for modernizing your legacy desktop applications, including Sage Pastel. Seamlessly access your business software, corporate tools, critical applications, and files from any location, ensuring unparalleled flexibility and business continuity.*

How VirtuoCloud Operates: Seamless Cloud Application Access

VirtuoCloud empowers users with secure, browser-based access to all their essential business applications. Through the customizable VirtuoCloud Web Portal, users can effortlessly connect to and view applications like Pastel Partner and Pastel Payroll directly within their web browser.**

Our innovative HTML5 web portal ensures universal device compatibility, allowing access from Windows PCs, Apple Mac devices, and tablets. This means your team can work efficiently from any location in South Africa or globally, ensuring uninterrupted business operations and enhanced remote work capabilities.***

* User need to have Microsoft Office 365 licences.

** Most widely-used web browsers like Google Chrome, Microsoft Edge, Firefox, Opera, Brave, and Safari support HTML5. However, we cannot ensure compatibility with all less common browsers that have unique configurations and settings.

*** Certain devices may not be compatible with the screen sizes of Sage Pastel software, as it is not optimized for viewing across different devices.

Sage Partner

Advantages of Virtuo Cloud

If you're not quite ready to fully adopt cloud technology, VirtuoCloud allows you to continue using your existing systems while still benefiting from the advantages that true cloud solutions offer.

- **Local Delivery of Applications:**

Easily distribute your applications to the devices of remote users and branches.

- **Infrastructure Security:**

Ensure all remote connections are SSL-encrypted for enhanced security.

- **IT Budget Optimization:**

Save on IT expenses by avoiding the need to redevelop apps or buy costly alternatives.

VirtuoCloud is a Fully Managed Environment

With VirtuoCloud, your critical business data is always protected. Our advanced cloud security employs firewalls, secure encryption, and enterprise-level protocols to safeguard your information, giving you complete peace of mind around the clock.

- **Daily Backups - Arcserve**
- **Custom Backup Retention**
- **24/7 Monitoring (VM - not application)**
- **Managed Windows OS Updates**
- **4 Hours system administration per month**
- **Priority 24/7 Technical Support**
- **99% uptime SLA (Month)**
